Structural and masonry works continue at Century Spire Façade curtain wall installation in progress

As of November 2019, structural works at Century Spire are already on the 50th floor. Interior masonry, plumbing and electrical works are also underway.

Further, the curtain wall of Century Spire is being installed by the top international contractor, Jangho Curtain Wall Co. Ltd.

For Century Spire, Jangho is installing 33,594 square meters of Unitized and Semi-unitized Curtain Wall System with Insulated Glass Units, and a Storefront Curtain Wall System with glass canopies at the Ground level. Jangho has started with the installation of steel brackets and curtain wall panels and is now at the 9th floor; targeting to finish midlevel by the second quarter of 2020.

Century Properties Group tapped the multi-awarded firm to implement Libeskind's dramatic façade and crown. Jangho has installed the curtain wall of hundreds of skyscrapers worldwide, including the Marina Bay Sands Integrated Resort, The Land Mark of Abu Dhabi, and Saudi Arabia's tallest tower, CMA.

Century Spire is developed by Century City Development Corporation under Century Properties Group, Inc. and is located within the masterplanned community of premium high rises in Century City, Kalayaan Avenue, Makati City.
